

Communicating effectively on safety-related matters is critical to the safety of workers in environments such as construction sites, waste management facilities, manufacturing plants, factories and warehouses.

This course gives overseas workers the vital English skills and knowledge they need to discuss safety-related matters in English, follow instructions, support each other, and contribute to a safety culture in the workplace.

How do you learn?

During the course, learners listen to conversations, watch videos, look at work-related photographs, signs and posters, learn safety-specific vocabulary, and study essential grammar and pronunciation focus points. They take a wide range of exercises to help learn the language they need to understand and communicate effectively in safety-critical work-based scenarios.

What's in the course?

The course teaches essential language and communication skills in 20 key areas of safety.

- | | |
