

“Having an online platform such as this gave our students extra support as well as the freedom and flexibility to choose when and where they studied. Not only did it allow them to balance their personal commitments with their education, it also let them take responsibility for their own learning, development and time management – vital skills that will be assets to their personal and professional development.”

Unique Online Courses

Specialist Language Courses (SLC) is the UK's leading provider of online Medical English and Test Preparation services to the global healthcare sector.

Our courses enable thousands of healthcare students and professionals to study, work, travel, research, develop themselves, and communicate with each other in English, the lingua franca of medicine.

Courses are used by medical schools, nursing colleges, English language schools, exam test centres, healthcare employers and recruitment companies, and individuals around the world to support their learners, candidates, teachers and course designers.

How we make courses

SLC's courses are designed to maximise student engagement.

Content is motivating, fun and rewarding. Input is varied, media-rich and challenging. Exercises are short and focused with immediate feedback and opportunities to try multiple times to get the correct answers. Key learning points are recontextualised and recycled throughout a course.

Courses have clear pathways with clear results. Syllabi are modular, allowing students to focus on what is important to them in the order they want. Progress is clearly marked on the dashboard.

All courses are regularly reviewed and updated. We incorporate sector-specific changes, technology developments and student and teacher feedback into the content, so ensuring the courses are ever-improving.

The SLC Campus platform is provided by Avallain AG, whose award-winning best-in-class authoring and learning management tools are used by global education providers such as Oxford University Press, Cambridge University Press, Pearson and National Geographic Learning.

Activity 1: complete the notes
Listen to the first section of the talk and complete the notes. Use no more than three words and/or numbers in each gap.

used to be called

common

Vocabulary extension
Match the terms related with medication with their meanings

drug sensitivity	inability to tolerate a drug
interaction	measure taken to avoid a negative reaction to a drug
precaution	doctor's written drug order
prescription	action of one drug on another drug to affect effectiveness
side effects	strong advice about serious side effects of a drug
warning	unexpected additional reaction to a drug

What teachers say:

“

I really enjoyed the course in total. Vocabulary and pharmacy-specific content were really useful for me.

Rita, Medical and Pharmacy English lecturer, English for Pharmacy

”

“

“Working with the platform was very interesting for Sechenov students. They approached tasks with enthusiasm and responsibility. In my opinion, this online course is useful not only for students, but also for teachers, as it logically complements face-to-face courses of the English language for medical students. During face-to-face classes there is a good opportunity for teachers to discuss some tasks from the online course and check students’ progress.”

Marina, Senior Medical English lecturer, English for Doctors

”

“

“In an era where technology and online learning are becoming more prevalent and convenient, it is important to further integrate the use of online materials into the learning and teaching process. Having an online platform, provided by SLC, has helped RCSI Bahrain to do so.”

Christina, Online Course Coordinator, English for Nurses and English for Care

”

“

“This course is useful for me because it covered all my work activities: speaking, listening, writing the articles and abstracts, making presentations.”

Ekaterina, Medical English lecturer, English for Medical Academic Purposes

”

Online Medical English Courses

English for Doctors

Length: 100 hours

Level: B2 & C1
(upper-intermediate and advanced)

On this course, doctors and medical students learn medical terminology, clinical language and communication strategies. They develop the critical language skills needed to work with patients and colleagues, attend international conferences, work in English language environments, and keep up with the latest research.

Course topics include:

- Patient admissions
- Taking patient history
- Examining a patient
- Discussing a diagnosis
- Explaining tests
- Describing symptoms & disorders
- Discussing surgery & post-operative care
- Professional writing skills
- The body and anatomy
- End of life care

English for Pharmacy

Length: 20 hours

Level: B1 and B2
(intermediate)

On this course, pharmacists and pharmacy students build a foundation in the English needed to discuss pharmacy, the pharmaceutical industry and pharmaceutical processes effectively and confidently.

Course topics include

- Drugs and drug classification
- Nomenclature
- How drugs work
- Describing data
- Describing the industry
- Developing new drugs
- Drug interactions
- The history of pharmaceuticals

English for Nurses

Length: 100 hours

Level: B1 and B2
(intermediate)

On this course, nurses and nursing students learn a wide range of medical terminology, clinical language and practical communication strategies. They acquire the language they need to communicate effectively and confidently in a wide range of situations.

Course topics include:

- Talking about the body
- Describing symptoms
- Administering medicine
- Giving handovers
- Pressure area care
- Preventing falls
- Infection control
- IV therapy
- Pre- and post-operative care
- End-of-life Care

English for Care

Length: 60 hours

Level: A2 and B1
(lower-intermediate)

This course is designed for those working in care who don't speak English as their first language. It develops the key language and communication skills needed to look after patients in a wide variety of situations.

Course topics include

- Taking observations
- Eating, drinking and toileting
- Pressure area care
- Managing falls and injuries
- Working with elderly patients
- Managing infection control
- Talking about pain
- Dealing with mental health issues
- Dealing with mobility issues
- End-of-life care

English for Medical Academic Purposes

Length: 50 hours

Level: B2 (upper-intermediate)

This course provides healthcare professionals and students the academic English skills and techniques they need to research, study and present healthcare topics, issues and developments.

Course topics include:

- Academic writing skills
- Writing abstracts and research articles
- Writing and giving presentations
- Listening to and making notes on lectures and talks
- Understanding academic texts
- Academic vocabulary development
- Study skills and strategies

Medical Terminology

Length: 30 hours

Level: B1 – B2 (intermediate)

On this course, healthcare professionals and students learn the essentials of medical terminology so they are able to use both medical and everyday terms when studying, researching or working in a healthcare setting.

Course topics include:

- Key patterns – base words, prefixes, suffixes, Latin and Greek
- Eponyms, acronyms, homonyms and more!
- Hundreds of medical terms associated with the exterior of the body and..
- Hundreds more used for internal organs
- Multiple examples of how medical terms are used in practice to describe conditions and treatments

Online OET Test Preparation Courses

Reach OET B Medicine

Length: 50 hours

Level: B2 (upper-intermediate)

On these courses, doctors and nurses learn the language, the techniques and the strategies they need to perform successfully in OET.

Course content includes:

- Overview of the course, its structure and what the assessment grades mean
- Step by step guide on how to answer each question type
- Detailed focus on the different parts of the Listening and Reading papers
- Key techniques and formats in the Writing paper
- Analysing Case Notes and writing referral letters, including model answers
- How to perform at your best in the Speaking test roleplays
- Practice test questions

Reach OET B Nursing

Online IELTS Test Preparation Courses

Reach IELTS

Length: 50 hours / 25 hours

Level: B2 (upper-intermediate)

On these courses, students learn the essential language and techniques they need to excel in the international IELTS Academic English test. With extensive teaching, examining and materials writing experience, author Annelie Phillips has created a course that takes the mystery out of IELTS and explains clearly what candidates need to do to achieve a high score in each paper.

Course content includes:

- Video guides with vital strategies for each paper
- Step by step guide on how to answer the different question types
- What language to use in the Writing and Speaking tests
- What the examiner is looking for when marking Writing and Speaking tests
- Strategies for the Reading and Listening tests
- Writing-specific course with key techniques, language and model answers
- What to expect on the day

Reach IELTS Writing

What students say:

“This course is useful for developing article writing and presentation skills for professionals and young scientists.”

Ekaterina, medical student, English for Medical Academic Purposes

“The course has helped to use English in such specific medical situations, I’ve never thought of before. It was very useful to listen to various dialogues with native speakers because it gave me opportunity to pick up many phrases and collocations which are used in real conversations.”

Matvey, medical student, English for Doctors course

“In my opinion this was very useful. Not only did this allow me to obtain new information that’s very important and common in our profession, but also allowed me to spend my time in a useful and productive way. Learning this way is much more fun and efficient and I hope we get to have another course in our third year.”

Abeer, nursing student, English for Nurses

“It was very useful since I learned many medical terms and other vocabulary related to my studies and my future career. Also, I have learned how to communicate appropriately and professionally since it showed many conversations between health care providers and nurses.

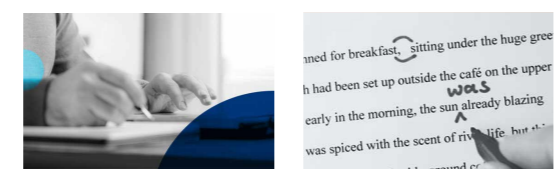

Nawraa, nursing student, English for Care

OET and IELTS Assessment

Our online OET and IELTS assessments enable healthcare employers, recruitment companies and medical education institutions to understand a test-taker’s current level and what training is required for a learner to achieve a required level in either test.

- Written by test creation experts
- Delivered online under strict timing
- Easy to use
- Writing is submitted by candidate and marked by an OET or IELTS expert
- Speaking is conducted live in SLC’s online classroom by trained examiners
- Accurate skill by skill reporting
- Training recommendations where required

OET and IELTS Writing Correction

More doctors and nurses fail the Writing paper in OET and IELTS than any of the other papers.

SLC’s OET and IELTS Writing Correction Service provides detailed feedback and suggestions for improvement using the official marking criteria.

- Was the question answered effectively?
- What level of grammatical complexity was shown?
- How wide-ranging was the vocabulary?
- How well connected were the different parts of the written text?

Texts are marked by trained examiners. Learners understand where they need to improve and are given practical guidance on how to do so.

Your questions answered

1. What sets these courses apart?

Plenty.

- ✓ Unique suite of courses in one place
- ✓ Focus on healthcare students and professionals
- ✓ Expert content, regularly updated
- ✓ Learner tracking and reporting
- ✓ Cutting edge learning platform

2. What support do I get?

Lots.

- ✓ Free set up
- ✓ Free access for key staff
- ✓ Technical support
- ✓ Academic support
- ✓ Administrative rights so you can check learner progress at any time
- ✓ A unique set of course materials, constantly updated to meet changes in medicine and care

3. Can the courses be customised for my organisation?

Yes.

- ✓ Select which modules you want for your learners
- ✓ Commission additional content for your institution
- ✓ Set course durations
- ✓ Have your logo and branding on the courses
